<u>Size</u>	<u>Length</u>	<u>Prod #</u>	<u>Full Ctns Only</u>
8d	2-1/2"	G0118	\$201.06

SPIRAL MASONRY NAILS

Made of high carbon steel and then heat treated and tempered. The fluted shank provides increased holding power. Used for fastening furring strips, cleats, floor plates, partition walls, etc. to masonry. Nails should be driven 3" or more away from end or edge of masonry or block. Normally only 3/4" penetration is recommended. (It is recommended that safety glasses be used when driving any hardened nails.) 5# cartons - Not sold in less than 5# cartons.

COMPOSITE DECK STAR SCREWS

Designed for exterior use with composite materials. Eliminates mushrooming and blemishes that can occur on composite materials. Pancake head pulls excess material into hole while counter sinking. Star Drive – twice the torque of Phillips or square drive. Tapered threads grab excess material and pull it down. Coarse threads – deep, wide and sharp threads cut cleanly and easily with maximum holding power.

FASTENERS and STAPLES

HAMMER STAPLERS

Duo-Fast Hammer Staplers are precision-made tools that you swing like a hammer. They are convenient to use at arm's length, overhead, or at floor level. The back-end loading, high-capacity magazine lets you reload quickly and easily. A quick opening Jiffy Jaw system permits fast cleaning and easy jam clearing. Made of heavy-duty steel construction. Its unified trip-lever cam linkage design means fast, smooth driving action. The tool is light weight and balance-engineered for fast, easy, one-handed operation. **Load Capacity:** 2 strips of 84 (168 staples).

HANGERS, ANGLES, ANCHORS, CLIPS
BRIDGING & TRUSS SPACERS

POST ANCHORS

Provide 1-inch elevation above the concrete surface with built-in drain slots to keep posts dry. A large pre-punched opening for the anchor bolt allows some "play" for aligning the post. Recommended for extending the life of posts in decks, carports and other exposed structures (DP = Display Carton).

SKewed 45 DG. HANGER - SKH SERIES

Developed to provide a 45 degree skew hanger for the most common standard lumber, engineered lumber or plated truss applications. These hangers will bend to accommodate a 40 dg. To 50 dg. Skew range. Slant nailing is made easy with oversized hole diameters on inside flanges. Most sizes do not require miter cuts for installation. All listed sizes come in both left and right configurations.

RAFTER-TO-RIDGE CONNECTORS: For use with I-Joists

Designed to connect rafters to ridge beams in vaulted roof structures. The TMU was developed to help builders avoid custom sloped and skewed hangers for every situation. This connector is easily field adjustable to meet a variety of skew and/or slope applications. Shapes to any pitch from 8/12 up thru 12/12 down.

HANGERS, ANGLES, ANCHORS, CLIPS
BRIDGING & TRUSS SPACERS

TOP-MOUNT I-JOIST HANGERS: For use with wood I-Joists

Specially engineered for I-joist-to-header applications. The THO offers full lateral support of the I-joist top chord which eliminates the need for web stiffeners in most applications. The overhang style reduces nailing. Raised dimples help assure correct 45 degree nailing into the I-joist bottom chord.

RAFTER-TO-PLATE CONNECTORS

With the TMPH, builders can make rafter-to-plate connections at pitches from 6/12 to 14/12. Automatically adjust to any roof pitch within its range. No need to preset the pitches for every connector. Also, there's no need to preset the bird's mouth notching or bevel plate installation.
